

Tanzeel Aftab

DATA ANALYST / DATA SCIENCE / ML & ANALYTICS SYSTEMS

Srinagar, Jammu & Kashmir | +91 9149651440 | tanzeelq@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Data analyst who likes taking messy business problems further than the dashboard. Over 1.5+ years, I have worked with SQL, Python, Power BI, and Excel for operational reporting and automation, while independently building analytics and ML systems across forecasting, customer intelligence, supply chain, churn, and fraud risk. I am most comfortable when I can understand the problem, build the analysis, and turn it into something people can actually use.

HOW I WORK

Start with the question

Understand the decision behind the analysis before choosing the model or chart.

Build the whole path

Take work from raw data through analysis and modeling to something people can actually use.

Keep learning

Take on ambitious projects that push my skills across data engineering, machine learning, and applied AI.

EXPERIENCE

Everise via Tibil Solutions

Data Analyst | Jan 2025 - Present | Srinagar, J&K

- Track SLA, shrinkage, occupancy, and day-to-day operational performance, turning live data into Power BI reporting used by management.
- Automated recurring ETL and reporting work with Python (Pandas), Excel, and macros, cutting reporting time by 30%.
- Use SQL - including CTEs, window functions, and root-cause drilldowns - to investigate performance shifts and operational exceptions.

ONCABS

Web & Analytics Manager | 2024

- Analyzed website and campaign behavior with Google Analytics and built weekly Excel reporting for marketing performance and user engagement.

SELECTED WORK

TR-INSIGHTFORGE / AI BUSINESS INTELLIGENCE PLATFORM

- Built a full-stack analytics platform for business data using React, FastAPI, MongoDB Atlas, Pinecone, and Groq, bringing forecasting, segmentation, and AI-assisted analysis into one workflow.
- Combined ARIMA forecasting with automated parameter tuning, RFM + K-Means customer segmentation, and a RAG-based Business Advisor grounded in uploaded data; the documented forecasting workflow reached approximately 5% MAPE.

SUPPLY CHAIN INTELLIGENCE / FORECASTING TO DECISIONS

- Built a multi-stage analytics pipeline spanning demand forecasting, anomaly detection, model monitoring, inventory risk and optimization, Monte Carlo simulation, scenarios, economic validation, contingency planning, and warehouse outputs.
- Designed the project around the full decision chain: predict demand, quantify risk, test scenarios, optimize inventory, and validate whether the recommendation makes economic sense.

CUSTOMER CHURN / EARLY-WARNING SYSTEM

- Built an end-to-end churn system for 7,043 customers with Scikit-learn, Random Forest, SHAP, and Streamlit; achieved 0.83 ROC-AUC, 64% recall, and 58% precision on the held-out test set.
- Turned model output into customer risk scores, priority tiers, revenue exposure, explanations, and recommended retention actions rather than stopping at model accuracy.

FRAUD RISK ENGINE / PRODUCTION-STYLE ML PROJECT

- Built a production-style transaction risk system around XGBoost, FastAPI, Kafka, Redis, PostgreSQL, MLflow, Docker, monitoring, and ALLOW / REVIEW / BLOCK decision policies.

TOOLKIT

Analytics SQL, Power BI, DAX, Power Query, Advanced Excel, Pandas, Matplotlib

ML & Statistics Scikit-learn, Random Forest, XGBoost, SHAP, classification, clustering, forecasting, anomaly detection

Data & ML Systems ETL, data quality, model evaluation/monitoring, thresholding, Monte Carlo simulation, optimization, Kafka, Redis, PostgreSQL, MLflow

Applied AI & Apps RAG, vector search, LLM applications, Pinecone, Groq, FastAPI, Streamlit, MongoDB Atlas, React, Git/GitHub, Docker

EDUCATION & CERTIFICATIONS

Master of Computer Applications (MCA) - Islamic University of Science & Technology | 2024-2026 | CGPA 7.86/10

Bachelor of Computer Applications (BCA) - Islamia College of Science and Commerce | 2020-2023 | CGPA 7.45/10

Cisco Data Science Essentials with Python | Cisco Data Analytics Essentials
